

**Quality-Quick-Fix
Fasteners**

LEIFELD strap No.1200

The core of our system - the **LEIFELD strap** No.1200 - enables you to make a wide variety of installations with just one main component.

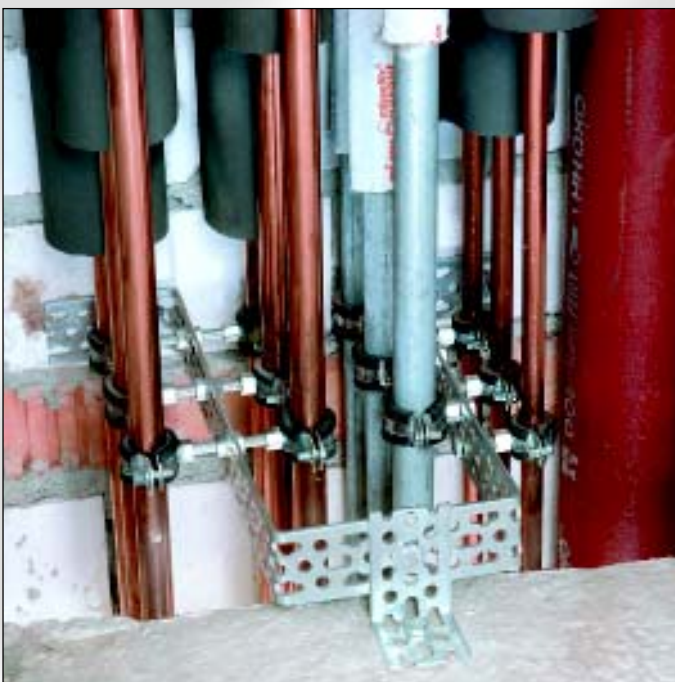

The carefully calculated positioning of the 3 differently shaped holes allow you to fasten just about everything. When installing all popular pipe systems, you should not need any extra fittings.

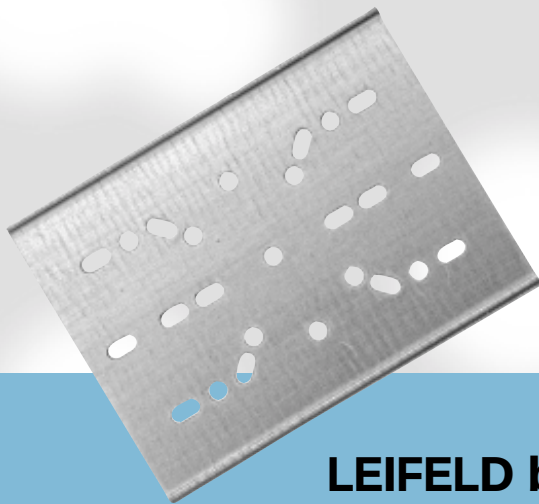

In fact, the **LEIFELD strap** can be used in so many different ways, this catalogue would burst if we showed them all!

All standard installation plates with 40mm offsets can be used with the **LEIFELD strap**, no matter which pipework system is used. The **LEIFELD strap** is also ideal for the installation of concealed service valves. Paired fittings can also be fixed quickly, at precisely the right height.

LEIFELD backing plate No.1280

The **LEIFELD backing plate** offers extra security when installing fittings with the **LEIFELD strap**.

LEIFELD pliers No.1222

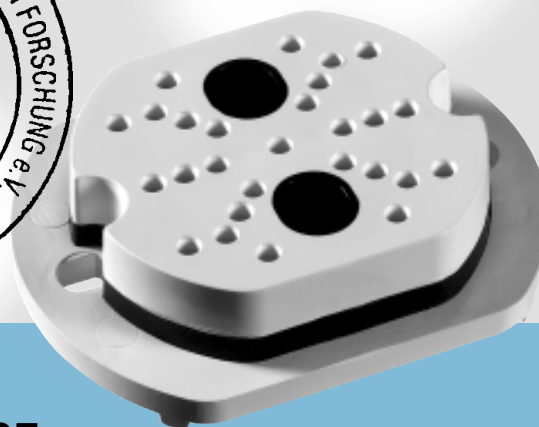

Use **LEIFELD pliers** for quickly and securely fabricating brackets from the **LEIFELD strap**, for every installation. Use the **LEIFELD pliers** in a vice for making batches of brackets,. Bend up to 135° - useful when fitting housings.

Avoid using expensive special brackets by making your own, quickly and economically. The **LEIFELD strap** is a good choice for 'pre-wall' installation, especially in repairs or renovation where "one-off" brackets are often needed.

LEIFELD Sound-Shield No.1290

LEIFELD Sound-Cap No.1295

Effective sound insulation with a single component: the **LEIFELD Sound-Shield** forms an effective, easy to fit barrier to noise transmitted via a wall penetration.

The **LEIFELD Sound-Cap** is compatible with all standard concealed valves and clips over the **Sound-Shield**. No need to spend time filling gaps. Sound insulation where it is needed most.

Soundproofing at Keypoints

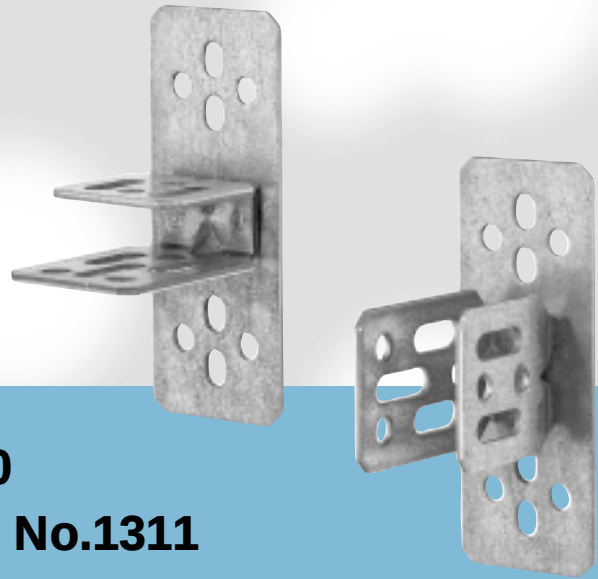

LEIFELD

LEIFELD C-profile No.1300

LEIFELD C-profile - for when you need maximum security. Used with the **LEIFELD strap** in a wide range of applications. The benefits are clear: pipe clamps can be installed without special fasteners. They are fitted to the **LEIFELD C-profile** with standard threaded rod or screws.

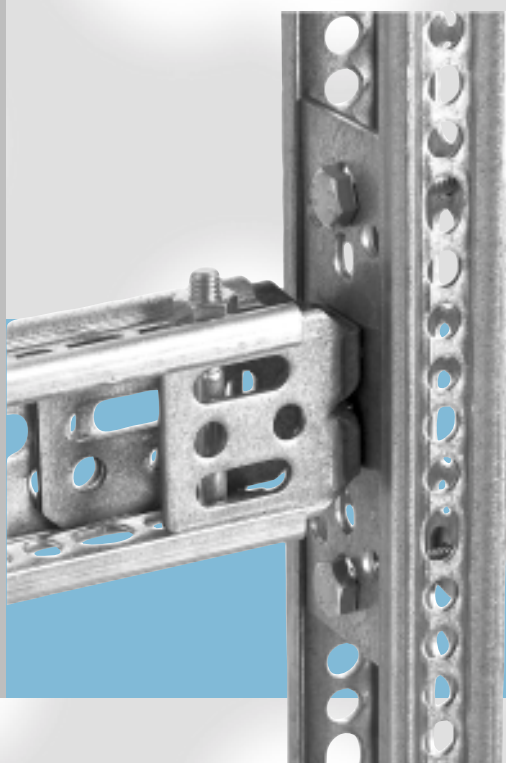

LEIFELD C-brackets (H) No.1310

LEIFELD C-brackets (V) No.1311

A useful add-on to **LEIFELD C-profiles** are **LEIFELD C-brackets** in horizontal or vertical versions. These are easily fitted, either bolted or crimped in place. Using this assembly, racks and cable trays can be fitted securely into ducts or shafts with a minimum offset from the walls.

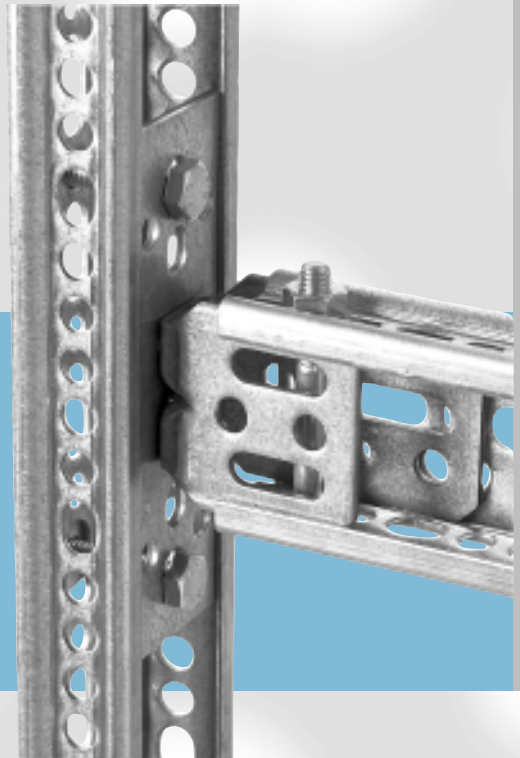

More features: pipe clamps can be fitted on both sides of the profile. Three rows of holes ensure a secure, properly aligned pipe-run.

This shows installations from another angle, with easy height adjustment and the option of adding more pipe-runs in the future.

LEIFELD

LEIFELD backing plate 153 mm No.1285

LEIFELD backing plate 80 mm No.1286

A quick reliable way of fitting angle valves & wall-plate elbows in a stud wall. The cut-out allows a wide choice of fittings to be installed. Marine ply resists warping, so the elbows are kept in true.

You can use it with fittings from all popular water distribution systems, ...

LEIFELD installation kit -SD- 153 No.1287

LEIFELD installation kit -SD- 80 No.1288

With this kit you can install concealed elbows/angle valves which are **sound proofed** and sealed against **splashes**. The penetration of the wall for angle valves & wall-plate elbows will be protected from the infiltration of damp. Dallmer sealing sleeves have a rubber seal to grip the elbow bonded to a waterproof collar fixed behind the tiles. This will keep the space behind the wall absolutely watertight.

- Backing plate with added
- Sound deadening sheet
- Dallmer sleeves
- Screws

Leifeld's philosophy is to offer its customers products that do the job properly, easily and quickly.

LEIFELD starter set No.1207

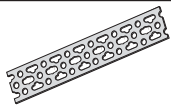

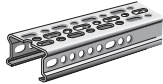

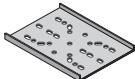

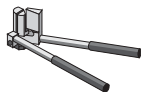

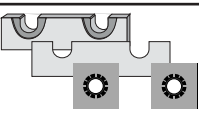

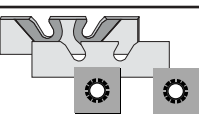

The cost-effective introduction with unbeatable versatility.

20.0 m **LEIFELD strap** No.1200 (enough for at least 40 installations)

4.0 m **LEIFELD C-profile** No.1300

1 **accessory kit** No.1235 complete with **LEIFELD pliers** No.1222 and a useful range of fittings.

	LEIFELD strap 50 x 3 mm with holes for installing fittings, pipe hangers etc, galvanized, for cutable and bendable. Standard lengths : 2.0 m 0.83kg / metre	Part-No.1200
